Cream Separator.

A New Road Map

An up-to-date automobile road map of Western Canada and Northern States has been issued by Gutta Percha and Rubber. This map shows all the travelled routes in the West from the Soo to Vancouver and Portland; and, besides, gives diagrams showing routes to the important cities outside this area, such as St. Paul, Chicago, Milwaukee, St. Louis. A E Michael is the agent here for Gutta Percha & Rubber Co.

Walter Rosnan Injured.

While the ball game last Thursday on the local diamond with the South Siders had reached a most interesting stage—4 all—Mr Walter Rosnan, the local champion base-runner, attempted a steal home from third base.

"Rosie" had just about completed a very successful slide in to the home plate, when a cleat on his right boot caught in the turf, twisting his ankle, breaking it. A doctor was hastily summoned, and the sufferer removed to his apartment down town.

On Saturday afternoon he was taken to an Edmonton hospital, where an X-ray of the break was taken.

Holborn Happenings.

The U. F. W. A. are holding a dance in Holborn Hall tomorrow night, the 19th, and Barth's orchestra will provide the music.

Mr and Mrs A. J. Anderson are at present on a motor trip thru the Banff and Windermere districts.

The crops in this district are looking particularly fine at present, after the recent drenching rains.

Word has reached here that the schoolhouse at Strawberry Creek, across the river, was completely destroyed by fire last week.

Hansen's Corners.

The first white crow to be shot in this part of the country was brought down last week by one of the district's early settlers, Mr Donald McDonald. The feat was accomplished with the aid of an old time argubus.

At first sight the bird was thought to be a Scotch nightingale; but a closer inspection showed the shade to be a battleship grey—a bird the color and build the like of which had not before been seen hereabouts.

The crow was going about its ordinary daily avocation, collecting fodder, in the company of two other common or garden variety of crow companions, when it was discovered by the eagle-eyed Scotsman, who forthwith bagged the feathered curio.

The local ornithologist declares the bird is not a purebred crow but a cross between the Raptore and the Rasores species, with an orange labium.

The Spirit Of Adventure

Sir Edward Grigg, Governor of Kenya, one of Britain's East African dependencies, who is at present on furlough in England, recently delivered an interesting address in which he noted a decline in the old British sense of adventure and made an appeal for a re-kindling of this spirit in the new generation. Without it, he held, the new generation would not be the equals of their fathers, grandfathers and great-grandfathers—those three generations that, practically within the reign of Queen Victoria, had built up the Empire as we know it today.

Decline in this sense of adventure Sir Edward attributed to the nervous depression produced by the Great War, and he urged that a revival of it would tend to promote support at home for development overseas, and that this would keep Britain and the Empire strong.

It may be that Sir Edward is right and that the old roving spirit which sent Englishmen, Irishmen and Scotsmen into all the nooks and corners of the world, civilized and uncivilized, and which in years gone by brought Canada, India, a large portion of Africa and many of the islands of the seven seas under the Union Jack, is not the impelling force it once was in the lives of British youth. But, on the other hand, it is not possibly true that the same spirit exists but in the changed conditions of the world of today it is merely finding other avenues of expression?

Tens of thousands of young men enlisted in the Great War purely in a spirit of adventure and Sir Edward is no doubt right that in that grim struggle they became disillusioned and a sense of depression followed on the heels of exaltation. Again, thousands of the most daring spirits among the young men of this generation gave their lives in that great adventure, men who today would otherwise be found following in the footsteps of their sires and grandfathers.

But is not youth today much as it has always been? Before the Great War many people entertained the opinion that mankind had become soft, that it could not face the sufferings and sustain the hardships accepted by former generations as inseparable from existence. The stamina displayed in the Great War demonstrated, to the amazement of all, how erroneous were such ideas.

In the spirit of adventure dead, or even on the decline? The attempt of Sir Hubert Wilkins and his companions, upon which they are now embarked, to make a dash in a submarine under the ice fields of the Arctic constitutes an adventure more daring than any that excited the imagination of a Jules Verne.

Or consider the recent adventure of Professor Piccard, and his assistant Charles Kipfer, who in a hermetically sealed aluminum ball attached to a balloon soared over 52,000 feet, almost ten miles, into the air, into that rarified stratosphere where winds do not blow, nor clouds form, but where the stars shine by day.

Then let us recall our own daring Canadian aviators who carried out the observation patrol along Hudson Straits to determine the ice conditions and navigability of that route, or who month in and month out maintain the forest fire patrols throughout our northlands, or are engaged in mapping unknown portions of Canada from the air.

All over the world daring and adventurous Britshers, including young Canadians, are engaged in engineering enterprises, building huge bridges, dams, hydro-electric plants, railways, amid jungles and in almost inaccessible places with the same zest and enthusiasm which carried their forebears into the unexplored regions of a by-gone past.

Canada this year celebrates the fiftieth anniversary of the commencement of the Canadian Pacific Railway—a great adventure, followed by a still greater adventure on the part of the thousands of men and women who in a few short years settled and transformed the prairies of Western Canada into great wealth producing provinces now inhabited by over two million people.

No, the sense of adventure is not dead; we doubt if it is even on the decline. For example, give a thought to the daily adventures in the realms of science and invention where patient and courageous souls are discovering more wonderful and finer things than ever did the romantic discoverers and explorers of the past.

Today the sense of adventure is very much alive, but it manifests itself in new ways and in different channels in keeping with the changed conditions of a scientific and machinery age as contrasted with those which preceded the age of steam and electricity. That is all, and there is no ground for pessimism, that the British race is losing its determination and grit.

Seeking Record In Flight Around World

Youths Expect To Make Trip In Ten Days

Wiley Post and Harold Gatty, two prudent young men, have figured out the comparative hazards of flying around the world and trying to cross a busy street—and they've decided to fly around the world.

"We got an expert to look over our motor," said Post at the Hotel Baltimore, New York. "Then we figured our chances. We found we had something like 3½ chances of getting hit by an automobile for every one chance that the motor would stop when it wasn't supposed to.

"No, we're not afraid. If we were, we wouldn't go."

Post used to do what he called "rough necking" in Oklahoma oil fields, and Gatty was an Australian marine navigator.

They've got a great, shiny monoplane on which they pin their hopes of circling the globe in something less than ten days for a record.

Recipes For This Week

(By Betty Barclay)

CHOCOLATE ICE BOX COOKIES

5½ cups special cake flour, sifted.

1 teaspoon soda.

3 eggs, slightly beaten.

1 cup sifted brown sugar.

1 cup granulated sugar.

1½ cups butter or other shortening.

8 squares unsweetened chocolate, melted.

4 cups coconut, chopped.

Sift flour once, measure, add soda, and sift again. Combine other ingredients in order given and add flour last. Pack tightly in pan 8½ inches, lined with waxed paper. Chill overnight. Remove loaf from pan, cut in half, and slice crosswise in thin slices. Bake in hot oven (400 degrees Fahrenheit) 5 minutes. Makes 6 dozen cookies.

RASPBERRY DELIGHT

1 package raspberry flavored gelatin.

1 cup boiling water.

1 cup raspberry juice and cold water.

1 cup canned raspberries, drained.

Dissolve gelatin in boiling water.

Add raspberry juice and water. Pour ½ into mold. Chill. When slightly thickened, fold in raspberries. Fill mold with remaining gelatin. Chill until firm. Unmold. Serve with sweetened whipped cream, flavored with almond extract. Serves 8.

Persian Balm is a true elixir of youth. Refreshes and rejuvenates. Adds a youthful charm to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. Indispensable to the woman who appreciates subtle distinction. Delightful to use. Delicately fragrant. Soothes dry and irritated skin. Corrects and preserves. A flawless toilet requisite for every discerning woman. A true aid to beauty.

B.C. Apples

Gaining In Popularity In United Kingdom and On the Continent

British Columbia apples are gaining in popularity in the United Kingdom, on the Continent and in other world markets, according to R. Robertson, of R. Robertson Co., Limited, of Vancouver, who made a survey of the situation which included United Kingdom and the continent. He stated that the popularity of B.C. apples is assured in Europe and he looked for steady increase in demand.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A large mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

A Queer Bargain

Ten thousand cups of coffee was the payment offered by an Italian at Rovereto, Italy, for a motor car. Payment is to be on the installment system at the convenience of the seller, but the motor car, a small second-hand model, was delivered in exchange for the promissory note. A further term on the note is that the cups of coffee are transferable and the note negotiable.

W. N. U. 1234

Forced Labor Spreading

Foreign Purchases Help Soviets To Enslave People, Says Duchess Of Atholl

The Duchess of Atholl in an address at London, said there are now several millions of men, women and children performing forced labor in Soviet Russia—and they've decided to fly around the world.

"It is estimated that over five million persons were forcibly deported under the February, 1930 decree, chiefly to the forests of the far north of Russia.

"Many of them arrived there in the winter and had no houses until they had built them for themselves. History, I think, records no such wholesale uprooting and banishment of peaceful fellow-citizens as this.

She reported that the forced labor had spread to collective farms, handling the grain and timber and other industries.

"That this enslavement is due to the five-year plan is unquestionable," she concluded. "That the shaping and execution of the plan is being assisted by foreign experts, foreign credits and foreign purchase is further undeniable.

"Canada has taken action to clear herself completely of responsibility in the matter. Are countries such as the United States and Great Britain, both of which have made sacrifices in the past in the name of freedom, satisfied to do less?"

Berlin Opens Skyscraper

Only Eight Stories High But Is Tallest In Europe

Berlin's tallest building "Europa House," has just been officially opened. It is only 180 feet high, with eight storeys, but is declared to be the tallest business house in Europe. It contains 30 stores, 450 offices, several large halls, a hotel, a restaurant, a swimming pool and a post office. The roof garden has a dance floor. The building is illuminated at night with Neon lights, stretching for nearly half a mile along its front. Express elevators carry 3,000 passengers an hour.

Ship Bees To China

Bees From Alberta To Be Sent In Large Quantities Next Fall

Alberta bees in large quantities are to be shipped to China next fall, according to plans of Geo. Riedel, president of Riedel's Honey, Ltd., of Vancouver, who is in Calgary the other day. Mr. Riedel plans to export his bees to China after the honey season here is over, to take advantage of the recent keen demand in that country, where some 1,500,000 yen is spent annually for bees imported from Japan.

Labor Minister Seeks

Data On Unemployment

Is Making Survey Of Conditions In Western Canada

A survey of actual unemployment conditions throughout Canada will be conducted personally by Senator G. D. Robertson, Minister of Labor. Because conditions in Western Canada are more acute, he will start investigation there. Upon his return, a similar mission will be undertaken throughout Eastern Canada. A detailed report to the government will climax the coast-to-coast trip.

Accompanying Senator Robertson on his western trip will be the superintendent of unemployment service and the director of unemployment relief. Discussions will be held with provincial governments and representatives of the largest municipalities. In addition, first hand information on rural conditions as they exist at present and as they may exist during the fall and winter, will be secured.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Gray's Worm Exterminator.

Factories Reopened In Orient

The slump in the price of soy beans in Manchuria has proved a blessing for Japanese and Korean farmers, who are able to afford large quantities of bean cake fertilizer. Demand for fertilizer at the new prices has become so great that many Chinese factories making bean oil and cake have reopened after years of idleness. New factories are being organized.

Insanity Increases

Stock Market Losses Are Held Responsible By Mental Hospital Authority Of Quebec

Stock market losses were blamed for an increase in the number of the insane during a discussion at the American Psychiatric Association Convention at Toronto by Dr. A. H. Desloges, director of mental hospitals for the province of Quebec.

The increase of insanity in his province for the past year was 14 per cent. of the total number of cases as compared with the previous year's increase of five and a half per cent, said Dr. Desloges, and he attributed the disparity to the loss of savings by uninitiated investors. He urged government protection for the latter as a step in mental health.

Improved Method For Surveying From Air

Described By Chief Of British Topographical Survey

A new and improved method of aerial survey was described to the Royal Society of Canada by Brig.-Gen. Charles Delme-Radcliffe, chief of the British cadastre and topographical survey. Originally developed in Italy, this method, said Sir Charles, was as rapid as stereoscopic surveying by air and as accurate as the old-fashioned transit survey. The photogrammetric method, which had not yet been used in Canada, is based on a series of photographs from the air, each of which overlaps the next picture by 66 per cent. It is regarded as a great improvement over surveying methods now in use.

Suffered From Heart Trouble

Became Weak and Run Down

Mrs. Wm. Dietz, Glenside, Ont., writes:—"For a long period I suffered from heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her my trouble. She said she had had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time she had been relieved of her trouble, so I got two boxes and after taking them I am again feeling fine, and always recommend H. & N. Pills to anyone complaining of heart trouble."

Price 50¢ a box

Sold at all drug and general stores, or mailed direct on receipt of price by The W. Milburn Co., Ltd., Toronto, Ont.

Spirit Of Nationalism Is Largely Responsible For World Depression Says Sir George Paish

Sir George Paish, formerly editor of the London Statesman and one of Great Britain's most distinguished economists, is in the United States holding conferences with leading statesmen, business men, and bankers. He sets forth in an interview in Barron's Weekly his views as to the causes for and the remedies to be applied in curing the business depression now prevailing in this country and the world at large. He is genuinely alarmed over the outlook, says the Manitoba Free Press, and states that the spirit of nationalism in the United States and Europe is responsible for the depression and that it is forcing the world into bankruptcy. In his interview he says:

"Without desiring to be severe, I am compelled by the facts of the situation to state, and to state definitely, that the spirit of nationalism in the United States is in no small degree responsible for world trade depression, as well as for the depression in the United States, and that unless this spirit is changed, both in the United States and in other countries, from that of nationalism to one that may term universalism, that is, the spirit which promotes a policy beneficial to all nations, any remedy of the present situation cannot be found."

"The distress in which all nations find themselves today must inevitably increase until there is a real danger of both a trade and a credit breakdown. The policy that is being pursued, not only in America but also in Europe and in other countries, is forcing the world into bankruptcy and with it into revolution. It is impossible to survey the political conditions now prevailing in the world without a feeling of great anxiety. Already, many revolutions have taken place in South America and in some parts in Europe, and others will undoubtedly take place if this policy is persisted in."

"The remedy is not an effort to be more self-contained, not an effort by each nation to do without the rest of the world, but an increasing effort towards co-operation with other nations in the interest of the common well-being."

"Possibly in ancient times there was something to be said for the policy now being pursued when the racial spirit was so strong and nations were in process of formation, but in these days, when the world has become an economic unit and each nation has for a very considerable period been bringing its contribution to the common well-being, it is not only folly but also criminal for nations to seek to go back to the policy that was suitable to primitive conditions. If pursued in the future, it would lead to a condition of distress without parallel."

"The only possible policy that will carry the nations out of their present troubles into a new and greater spirit of prosperity is a policy of collaboration and co-operation, which will make the whole world still more efficient as an economic unit, which will expand the productive power of all countries, which will expand the trade of all countries, and which will bring universal prosperity."

"The effort to go back to the old conditions has already brought great suffering, and the continuance of this effort will intensify this suffering in a manner that no reasonable being desires to contemplate."

"The immediate outlook is most disturbing, and it is evident that constructive measures for the rehabilitation of the prosperity of all nations must be taken without delay if disaster is to be averted."

"Darling, my lip-stick is not sealing wax."—Der Lustige Sachse, Leipzig.

Ship Model Breasts Man-Made Wind and Wave

Ingenious Tank Experiments Made With New Canoe Model

In an effort to make the new super-canoe at near fool-proof as human ingenuity and modern marine science can make her, the most extraordinary preliminary tests have just been completed with an exact replica model of the ship.

These tests made with the utmost care, were performed with an 18-foot model in a 300-foot tank in which miniature gales and heavy seas were mechanically created to reproduce actual conditions on the Atlantic which the great liner will have to face at all seasons of the year. These tank trials are a combination of years of minute experiments made with models. The designers are convinced that the new ship will prove to be the most perfect vessel possible for the work she is intended to perform.

The tank wave-making apparatus consists of a rocking diaphragm mounted on steel angles and plates. This is mounted on the tank, and end towards which the tank with crests square to it, and through which the model passes in the opposite direction in each experiment. The capacity of the wave-gear permits a reproduction to scale of storm conditions, of wave-length and height in the North Atlantic corresponding to a gale of about 60 knots. The sea condition of the ship, which is represented by these experiments in artificial waves, is that of steaming against a very regular head-on sea.

In order to study the behaviour of the vessel in wind-storms, ingenious methods are used to reproduce actual conditions in miniature. A model of the ship made to scale, fitted complete with superstructure, funnels, ventilators, boats, etc., is placed inside a tunnel built of plywood and having an observation window of plate-glass extending along the front of the tunnel. Both ends of the tunnel are open and to one end is attached a large suction fan capable of drawing air through the tunnel over a wide range of air speed. At the other end of the tunnel is fixed a large sheet metal bell-mouth and grid for steady and equalizing the velocity over the area of the tunnel.

Two smaller fans are placed in the back of the tunnel. One is connected to a metal box containing sal-ammoniac crystals, and thence through trunking to the funnels of the model. Heat applied to the sal-ammoniac drives off white fumes or smoke. The heat from the fan carries this smoke up and out through the funnels. The speed of this fan can be varied to represent the proportionate speeds of the funnel gases as in the ship. The other fan is connected to all the ventilators by an intricate manifold trunk and draws air down through all the ventilators, again reproducing actual ship conditions.

When all the fans are in operation the model faces a head-on wind, the smoke streams out of the funnel and follows the paths of the induced air currents adjacent to the funnels, the ventilators draw down their supply of air. Thus in miniature, can be studied the behaviour of the smoke under any number of combinations of wind speeds, funnel gas speeds, ventilation speeds, with various types and proportions of funnels. By experimenting with these combinations, and by a process of elimination, designers arrive at the type of funnel or set of funnels which will result in the least possible contamination of decks and ventilation on the new giant Canamander.

It may not be proper to precede the father of your best girl downstairs—but sometimes it is policy.

B.C. Lumber Industry

Large Orders From Australia and Britain Mark Beginning Of New Era

British Columbia's lumber industry, backbone of its whole business life, started to swing back towards prosperity recently with the placing of orders for 4,000,000 feet of mining timber for Australia and 1,500,000 railway crossing timbers for England.

In announcing receipt of these orders by British Columbia mills, Hon. N. S. Loughheed, minister of lands, declared it was the best business news British Columbia had heard since the start of the industrial depression.

"The lumber industry, as it may be, is jubilant," he said, "for this, it is believed, marks the swing of the pendulum upwards. And I can say without going further at this time that it will probably be the forerunner of other large orders. It looks as if the lumber business had reached bottom and was going to climb upwards again in a way which seemed impossible a short time ago. This same situation occurred in 1916, when a big order for lumber from England started the wheels to turn in our mills once more."

Comparing Present With Past

World Changes Many Of Its Beliefs During Progress Of Years

News from Lisbon of sharp earthquake shocks naturally recalls the great Lisbon earthquake of 1755, one of the greatest seismic disasters in history.

But to those who like to compare the present with the past to the present's advantage it will also recall the prevailing belief 176 years ago that the Lisbon earthquake was a visitation of God. There was some preaching in this country to similar effect when a storm swept out of the Caribbean a few years ago and devastated Southern Florida. But even intellectuals of 1755 like Voltaire were inclined to see God's hand in the earthquake and tidal wave that destroyed 50,000 lives in the Portuguese capital.

The world changes many of its beliefs in a century and three-quarters. If what we like to consider twentieth century knowledge smiles patronizingly at eighteenth century ignorance, what will be the attitude of the future of 176 years to the present whose theories as to the causes of earthquake are still as vague as superstitions themselves.

People Should Use Eggs

One Of Most Valuable Foods and Price Is Low

People who have families to feed and who must count the cost of every thing they buy are foolish if they do not make a full use of eggs and butter these days. Word comes from Toronto, however, that people are not buying as many eggs as when they were double or treble the price. An egg, so long as it is fresh, is just as good at a cent as one at five cents. People who are not thrifty enough to take advantage of the present low prices are not good managers. Butter, milk and eggs, the three most valuable foods obtainable are now procurable at lower prices than for years.

It is strange how a man will chase a girl until she catches him.

Don't drop insinuations. A bigger man may pick them up.

NEW HEADS OF 'CANADIAN MANUFACTURERS' ASSOCIATION

Canada's National Parks Are Becoming Important Factors In Dominion's Tourist Industry

Winnipeg Newspaper Union

(By Annette)

SMART JUMPER DRESSES THE LITTLE OHIO FARISSHEES ARE WEARING

Today's cute dress style is quite individual. The tiny French bodice is designed with open "V" at the front and at the back. The skirt is comfortably full to allow sufficient freedom that small folk need for playtime. Joined to the yoked bodice in soft gathered treatment gives a very dainty effect. The gimples is fetching with Peter Pan collar and turn-back sleeve cuffs. When the warm weather arrives, the little gimples may be discarded. This sturdy blousier dress in baby blue and white gingham check uses white batiste for the gimples.

Style No. 211 is designed for tots of 2, 4 and 6 years. Dainty prints, cotton broadcloth prints, linen, pique, percales and wool jersey make up nicely and are practical as well. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Canada's national parks are from year to year becoming greater factors in the rise of the Dominion's tourist industry. The attraction and entertainment of the thousands of visitors who are annually taking to the roads and trails of this continent is rapidly becoming a Canadian industry of national importance. Areas of great natural beauty are being more and more sought and the army of vacationists upon whom the great outdoors has cast its beneficent spell continues to grow.

The far reaching importance of the national parks in increasing the flow of tourists to the Dominion is shown by the growing numbers who annually visit these great scenic playgrounds. Last year half a million people flocked by rail, motor, and boat to the parks. Both those in the West and those in the East were well patronized, the total being 544,350 visitors. Banff Park attracted the greatest number, 188,443 visiting the famous Alberta resort. Jasper Park drew 13,783 persons; Kootenay Park, 43,125; Yrion Lakes Park, 44,527; Banff Park, 12,537; Elk Island Park, 30,138; and Glacier, Revelstoke, and Yoho Parks combined had a total of almost 30,000.

Prince Albert National Park, Saskatchewan's unit in the Parks system, recorded a considerable increase in the number of visitors last year, the 1930 total reaching 17,164, or 7,000 more than the previous year. In the first year of its existence, Riding Mountain National Park in Manitoba, entertained 15,023 persons.

In the East, national parks and recreational areas also attracted increasing numbers. Point Pelee Park, the most southerly point in Canada, and the St. Lawrence Islands Parks, both in Ontario, reported higher totals. Point Pelee had 104,000 visitors last season and the Islands Parks drew 15,000. The historic parks, Fort Anne in Nova Scotia, and Fort Beauséjour in New Brunswick, had 18,000 and 12,000 visitors respectively.

Indications for the present season point to another large influx of visitors to the national parks and surrounding areas. Numerous requests for information are being received in the Department of the Interior. Of special interest is the fact that the 1931 annual camp of the Alpine Club of Canada will be held in Prospectors' Valley in the shadow of the Tees Peaks in Banff Park.

Alberta Creameries

Cream Receipts in Alberta Are Reported On The Up-Grade

Cream receipts in Alberta creameries continue on the up-grade with 1,642,057 pounds of butterfat recorded for the five-week period ending May 2nd, an increase of 80 per cent over April last year, according to Dr. C. P. Marker, dairy commissioner. The central section of the province made a gain of 92.3 per cent for 1931 during the first 16 weeks. The average test in 1931 was 32.4, a gain over the 31.3 mark of a year ago. The main volume of cream has shown better quality as 62.4 per cent graded "special." Total cream receipts in 1931 reached 4,503,229 pounds of butterfat.

Private hoarding of funds has been condemned by the Portuguese government.

How did you manage to cut off a bit of Miss Frieda's hair without her noticing it? "I clipped it off when she had gone out, sir."—Kasper, Stockholm.

Theatrical Manager: "What's your line?"

Applicant: "O'er-anything in the line of tragedy."

Theatrical Manager: "H'm. Well, let's see what you can do. Make me bob like a child.—London Opinion.

WORLD HAPPENINGS BRIEFLY TOLD

As a result of a recent change in its postal service, Poland now has a post office for every 6,300 inhabitants. The Central Bank of Shanghai recently shipped gold bars to the value of \$5,100,000 to Vancouver on the "Empress of Asia."

The Irish Free State Government rejected a proposal for establishment of a gambling casino at Bray, a seaside resort in County Wicklow.

Thirty-one French war veterans recently spent four days in London as guests of the British Legion, which has made them honorary members for their services in connection with Legion pilgrimages.

The international radio conference in Copenhagen, Denmark, at which about 40 nations were represented, ended June 9. A number of proposals were drafted for submission to the world congress, which is slated to be held in Madrid in 1932.

Delegates in Toronto to the World's Women's Christian Temperance Union Convention will carry home with them to the four corners of the earth unique souvenirs in the shape of small phials full of hard wheat from Alberta.

Economic indignation was put forth as one of the "main contributing causes of the business slump" affecting the United States in the "world wide epidemic of trade depression" by Senator Davis, of Pennsylvania.

Charles Lindley Wood, second Viscount Halifax, celebrated his 92nd birthday anniversary recently. He is probably the proudest father in Great Britain, for his only son is Lord Irwin, who recently retired from the high post of viceroy of India.

In behalf of enthusiasts of Charles Dickens in Toronto and Boston, wreaths were laid on the novelist's grave in Westminster Abbey, June 9, to commemorate the 61st anniversary of his death. The wreaths were composed of scarlet geraniums, Dickens' favorite flower.

Soviet School in London

A Soviet school with Russian teachers has been opened at a club in London, England, for children of the club's members, who are Soviet employees in the city. There are 20 pupils, who are taught the usual subjects, and both English and Russian, but not religion.

"No, I shall never forget the date of my husband's death. It was either 1910 or 1911."—Moustique, Charlott.

W. N. U. 1894

Vital Statistics

Eighth Annual Report Covering the Year 1928 Has Just Been Issued. The Dominion Bureau of Statistics has just issued the eighth annual report of Vital Statistics covering the year 1928. Although the more important figures for that year were given out in 1929 in preliminary form, the present volume, which contains detailed analysis for permanent record, has many features of great interest.

The report contains tables classifying the parents of children born during the year, under such headings as age, racial origin and birthplace. Tables of decedents are presented under similar headings, and special attention is given to treatment of causes of death according to age, nativity and conjugal condition, while the occupation of the decedent is tabulated for certain causes. Marriages are classified according to the age, birthplaces and religions of the contracting parties. Statistics of births, deaths and marriages are also given in detail by localities. The report contains special tables for the Indian population and for the Yukon and the Northwest Territories.

A very full analytical introduction is included in the volume.

Great Lakes' Level

Exceptionally Low

Will Hamper Fall Grain Movement Unless Rains Excessive

Movement of the grain crop down the Great Lakes will be considerably hampered next fall unless this summer sees an excessive rainfall throughout Ontario, Manitoba and middle western United States.

Such is the conclusion to which hydrographic experts in the Department of Marine at Ottawa are irresistibly driven following a check-up of the water levels of the Great Lakes and the St. Lawrence River.

Figures gathered by the department show that these levels are far below the average for this time of year.

Believes Wars Are Inevitable

British Scientist Says Mother Nature Uses War For Pruning. Man's dream of a world without war can never come true, Sir Arthur Keith, the British scientist, said in an address at Aberdeen University where he is the lecturer.

"Nature keeps her human orchard healthy by pruning," he said, "and war is her pruning hook. We cannot dispense with her services."

That "harsh and repugnant" assertion was wrung from him, he said, even though the future of his own dreams is a time of everlasting peace.

The ADVENTURES of CAPTAIN JIMMY and his dog SCOTTIE

WHAT CAME BEFORE? As Captain Jimmy and his new found friend Scottie were away from the Chinese territory in an old railway locomotive, Ted told how his brother had been captured by outlaws, and of his vain search.

As Ted told me the story of how his brother had soundly thrashed the bandit party, and how they had carried him away into the hills in revenge, it suddenly occurred to me that these outlaws were the same band from which I had recently escaped.

"We were so interested in our plans for getting him free that I failed to notice the trap which was set for us, and then I saw the whole parcel of Chinese troops waiting for us, adding where we found the engine. We slowed down to a stop, in a moment I climbed out and out the wires. We were still in enemy territory, many miles from Shanghai. Somehow we must get to our airplane and get going. Every moment's delay meant just that much less chance of regaining Ted Stone's brother, day alive. On and on I pushed the old engine, as fast as I could."

The country was flat and uninteresting. Most of the timber had been cut off years ago before the ground almost barren. After mile after mile we went on, after a time we began to see some hills. An occasional one would rise up along the way. The large wood began to appear on our left, stretching away to the horizon.

New Experimental Farm

Will Serve Large Area Of Three Million Acres In Southern Saskatchewan

The new experimental farm of the Dominion Government, located two miles south of Regina and a mile east of No. 6 Highway, which recently opened, will serve the Regina-Moose Jaw-Weyburn area which comprises some 3,000,000 acres of heavy clay soil. Soil drifting will be one of the problems to be investigated, at the farm, also weed control, comparisons of different methods of summer-fallow land for seeding, preparing stubble land for crop, the economic value of forage crops and their relation to the general problems and intensive studies of weeds prevalent in this area.

The average man is like a match. If he gets lit up, he loses his head.

Claim 'Plane Speed

Record Exceeded

Trials Flights Of Schneider Cup Pilots Were Speedy

The world's airplane speed record of 357 miles an hour, made by Squadron Leader August H. Orlebar in 1928 was reported to have been broken on several times by pilots in training for the Schneider Cup races.

While the figures have not been given out, it was understood pilots exceeded 360 miles an hour while driving racing seaplanes in trial flights.

Army Of School Teachers

There were 9,640 students training as teachers in the 46 normal schools and in 12 of the universities in Canada in 1930. About 70,000 men and women are annually employed as teachers in the schools of Canada.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

BRITAIN PLANS TO PUSH TRADE WITH CANADA

London, England.—Organization of a co-operative body representing British manufacturers to stimulate sales and service in Canada is the main recommendation of the important trade mission sent to the Dominion recently by the Federation of British Industries.

The mission's report declared: "The time is passing for firms, except those of great magnitude, to endeavor individually to sell their products in Canada. Co-operation of home producers is essential in order to build up a selling and service force in Canada sufficient to meet the pressure of competition from foreign countries."

The mission also makes important recommendations urging establishment of better communications and trade facilities between Canada and Great Britain, development of a policy of competition, and the organization of an Empire trade statistical bureau. The mission consisted of Sir James Lithgow, president of the Federation of British Industries; Sir Arthur Duckham and Mr. MacKenzie.

The mission confirms the attitude taken by the federation in reports drawn up for presentation to the last Imperial Conference, and, drawn up jointly with the general council of the Trades Union Congress, for presentation to the British Government last September. Special emphasis is laid in the report on the following conclusions:

(1) Development of Britain's trade with Canada must depend on acquiring new business at present in the hands of foreign countries, and development of new lines, and complementing and assisting the existing Canadian industries rather than competing with them; and on the investment of British capital in Canada.

(2) Closer commercial and industrial association between the two countries will result in an improvement in the preferential position already enjoyed by Great Britain in the Canadian market.

Many of the complaints made by Canadian importers against home exporters, of poor delivery and service, are justified and can only be remedied by closer and more personal contact, and a better appreciation of the local circumstances and requirements in Canada, the report continued.

Prospective trade with Canada are urged to make the closest study of transportation conditions, tariff regulations, etc., in order to facilitate acceptance of British goods by Canadian importers.

Greater use should be made by the industry at home of the service of the British trade commissioners in Canada, and industrial organizations should co-operate to this end, the report adds.

Gold Strikes In B.C.

Discoveries Are Reported In Two Widely-Separated Districts

Vancouver, B.C.—Reported gold discoveries in two widely-separated districts in British Columbia are attracting wide attention throughout the province.

In the northern part of the province on the Nation River, a tributary of the Parang River, about 110 miles northwest of Prince George, the reported placer gold discovery has attracted two precious metal seeking parties from Vancouver.

Meanwhile news of a rich ore strike on Lowhee, Ol' Vow Mountain, near Barkerville, 200 miles north of Ashcroft in the Cariboo, has been brought to Vancouver by four directors of the Cariboo Gold Quartz Company, which for several years has been carrying on development and research work in the neighborhood of Barkerville, where the ore body is known to be approximately twenty-five miles in length.

Dr. W. B. Burnett, of Vancouver, one of the party just returned from Barkerville, said that in the opinion of hard rock men, the strike may yet bring on a rush to Cariboo rivaling that of the early sixties.

W. N. U. 1894

Export Cattle Trade

Assuming Much Larger Proportions Than Was Anticipated

Ottawa, Ont.—The export cattle trade is assuming much larger proportions than was anticipated, with the result that there are numerous western shippers who are unable to book space from Montreal to Great Britain.

These shippers have notified the Federal Government of their difficulties and Hon. Robert Weir is endeavoring to increase the accommodation on ships, particularly for the summer months. He has had most of the heads of the shipping companies at Montreal up to Ottawa to see him, and is trying to persuade them to outfit more ships. One of the great difficulties which has to be overcome is that the British Board of Trade regulations announced early in the year and later suspended, are due to come into full effect in September. These regulations will add much to the cost of equipping ships for the cattle trade, and the shipping companies now hesitate to go ahead on the old basis, fearing that the government will not succeed in having the new regulations further suspended. It seems reasonably certain that failing the withdrawal of these new regulations in toto, the Canadian Government will get a further suspension probably until November 30, but this is not definitely assured as yet.

The question of providing more space is now under the consideration of the shipping companies and a decision will be reached within a week.

Freight Rates On Grain

Canadian Rates Stated To Be 25 Per Cent. Lower Than U.S. Rates

Ottawa, Ont.—Testifying before a special parliamentary committee on grain freight rates, Sir Henry Thornton said if they were regarded only from the point of view of the railways they were too low. Canadian rates were approximately 25 per cent. lower than United States rates.

At the same time consideration had to be given to the well-being of the west as a whole, and of the individual farmers. Grain should not be carried at a loss, and likewise the farmers should not be taxed too heavily.

Rates were very involved. Charges had to be made for shipping empty cars west before the crop and the revenue of the two or three months in which it moved could not be taken as a time indication of the return to the railway. If it were not for the revenue from western grain the road would be in a much worse position than it was, he added, and would not so remunerative as other commodities, but a railway was like a department store, what it lost on one traffic it had to make up on some other.

The average gross revenue per ton mile on general traffic was 1.08 cents in comparison with 528 cents for grain. These figures merely showed, said Sir Henry, that grain was about one-half as remunerative as general freight traffic.

Gandhi Will Go To London

Has Decided To Attend Round Table Conference In Full

Bombay, India.—Mahatma Gandhi will go to London, England, for the round table conference next fall regardless of the situation regarding the Hindu-Moslem problem, the congress party working committee has decided.

The committee voted a resolution expressing the hope that the communal problem would be settled but asserting that Gandhi's presence in London was essential whether a settlement is reached or not.

To Safeguard Dairy Products

Bill To Make Adulteration An Offence Will Be Considered

Ottawa, Ont.—Increased penalties for the adulteration of butter and other dairy products will be considered by the agriculture committee of the House of Commons. The House gave second reading, without discussion, to the bill introduced by Samuel Gobeil (Cons., Compton) which would amend the dairy industries act by putting heavier penalties on those convicted of offences under the act, and referred it to the agricultural committee.

TO FLY OVER PACIFIC

Col. Charles Lindbergh, famous United States flying ace, who won renown by flying solo to France, has now decided to try his luck over the Pacific Ocean. Lindy and his wife, daughter of Ambassador Morrow, will take off this summer for the long flight from the American continent to Japan.

Barriers On Trade

New Canadian Duties Are Discussed In British House

London, England.—Canada's tariff changes were brought up in the House of Commons recently. Rt. Hon. William Graham, president of the Board of Trade, promised questions that if further information revealed increases in duties against Great Britain, the government would consider the advisability of representations to the Canadian government.

P. A. Harris, Liberal, asked particulars of the new Canadian tariff and suggested the president of the Board of Trade should make representations "as to the undesirability of fresh barriers on trade at a time of universal depression."

Rt. Hon. Mr. Graham replied he had not received details of all the recent changes, but they would be published as soon as they were received. The point raised in the second part of the question, he went on, could not usefully be considered in the absence of fuller information than he possessed at present.

Mr. Harris asked if Mr. Graham would make representations if he eventually found that some duties were increased against Britain, and Mr. Graham gave assurance that the question would be fairly considered.

Altitude Record For Women

Saskatoon, Sask.—Nosing her Gypsy Moth airplane to an altitude of 16,000 feet, Miss Nellie Carson, of the Saskatoon Aero Club, created what is believed to be the altitude record for women flyers in Western Canada. The flight occupied an hour and 20 minutes. Miss Carson, who wore winter garments, experienced severely cold temperature and she had to be assisted from the machine when it alighted.

ENJOYING LIFE AT FAMOUS RESORT

"Just 'foolin' around and getting tanned," explained the Misses Ena and Brenda Sheffield, of Bournemouth, England, when a photographer at the Banff Springs Hotel made this picture. With their mother these two young Englishwomen have wintered in California and the Hawaiian Islands and are spending the early summer at Banff and Lake Louise before returning east to the Old Country.

Tragedy Of The North

Remains Of John Bennett Sent To England For Burial

Edmonton, Alberta.—The remains of John Noel Patch Bennett, 18-year-old schoolboy who sought experience and found death in the wastes of the Pine Pass district, 150 miles west of Grande Prairie, were forwarded to England from Edmonton this week.

Bennett's bleached skeleton, a wolf-gnawed rifle, a pack sack, a diary and a few shreds of the clothing that had been torn from his frozen body by the fangs of wolves that had unearthed it, were discovered by Kelly Sunderland, veteran Hythe guide, who had sought the boy's body for seven months, when he journeyed up Tillikum Creek late in May. Bennett left his home in Oakdene, Manor Road, Coventry, England, in order that he might gain experience which would school him for a diplomatic career, on which he intended to embark when he attained his majority. He would have inherited a large fortune on his coming of age.

Although warned of the perils of the journey he was about to essay, he set forth from Grande Prairie in October alone with a pack horse, hoping to make his way through Pine Pass to Prince George, British Columbia.

Caught by the winter, his horse abandoned, his moccasins worn out and his food supply exhausted, he struggled on. Finally, with feet and hands frozen by the intense cold of the mountain winter, he could go no further and sank down to die beside the lonely Tillikum Creek, where his body was found this spring.

Wants Conference On Stabilizing Silver

If Canada Leads It Would Be Great Advertisement Says Midland Bank Director

Ottawa, Ont.—It would be a wonderful thing for the world and a great advertisement for Canada if this country would call an international conference on stabilizing silver, said J. F. Darling, director of the Midland Bank of Canada, who returned to Ottawa from Washington. Mr. Darling's proposal for a bi-metal standard would place silver alongside gold as a standard of currency, at one-twentieth its value.

United States would send representatives to Ottawa, Mr. Darling declared. Mr. Darling expects to sail for England at the end of the present week from Quebec and will probably have a further conference with Premier R. B. Bennett before he leaves.

United States has so much gold she could stabilize silver without any co-operation from other nations, Mr. Darling stated. The only salvation for the present world depression was higher prices and Mr. Darling saw no method for accomplishing this except by bringing back the price of silver.

Better Understanding

Winnipeg, Man.—"It is vitally important that Canadians establish a greater understanding between industrialists and agriculturists," declared Elmer Davis, past president of the Canadian Manufacturers' Association, here. Mr. Davis is returning to the east following attendance at the annual convention of the manufacturers at Victoria, B.C.

CRITICISM HEARD OF EMBARGO ON RUSSIAN GOODS

Ottawa, Ont.—Definite opposition to the Russian embargo on the ground that it is "inconclusive, unbusinesslike, inefficient, and will hurt no one but ourselves," came from Hon. W. D. Euler, former minister of national revenue, who spoke during the budget debate.

"I am opposed to the Russian embargo," asserted Mr. Euler, and he went on to state that the government had put on the prohibited list such commodities as hard coal, lumber, furs, asbestos and pulp. The only one of these commodities which Canada imported was hard coal, and this the Dominion did not produce herself.

"The only good we do by putting hard coal from Russia on the prohibited list is to throw business to our friends the United States," the former minister declared. He had tried to ascertain the reason why the government had barred goods from Russia. Apparently it was because Russia "is an ungodly nation and because she has a system of government with which we do not agree."

"Are we acting as a Christian nation when we declare economic war against another country?" asked Mr. Euler. He held no brief for Russia, he had no sympathy with the methods adopted in that country, but he felt that nothing but harm could come to Canada through the imposition of the embargo.

He referred to the inconsistency—"It almost said hypocrisy"—of the Canadian High Commissioner to Great Britain, who had called in to the wheat conference delegates from Russia.

"Those delegates must have been laughing up their sleeves when he said that we wanted to have nothing to do with them, and then, by a side door procedure, we asked them to do something for us," remarked Mr. Euler.

For Permanent Peace

Ratification Of League Of Nations General Act Of 1928

Ottawa, Ont.—Ratification of the League of Nations General Act of 1928 for the pacific settlement of international disputes, was moved in the senate by Hon. G. D. Robertson, Minister of Labor. The House of Commons already has approved of Canada's accession, subject to certain reservations which apply not only to this country but to the other nations of the British Empire.

Senator Robertson said it was a long step toward establishing permanent peace throughout the world. Senator Dandurand heartily approved of the resolution and gave a history of the step accomplished by the League of Nations towards permanent peace. Sir Geo. Foster explained the position of the British government in 1924 on the protocol. The obligations, then, he said, were too great for Great Britain to subscribe to it, with the United States not being a party. The resolution was adopted.

Britain Is Importing Butter From Empire

Answer To Russia's "Five-Year Plan" Says British Member

London, England.—The empire's reply to the Russian five-year plan, is the description Sir William Wynn-Williams, Conservative member of the House of Commons and chairman of the Empire Dairy Council, applies to the increase in imports of empire butter to Great Britain this year.

During the last few weeks no fewer than 46 vessels from New Zealand and Australia will bring more than a million boxes of butter to British ports. Canadian butter is once more entering the British market, too, after being sent for five or six years.

France Opposes Debt Revision Paris, France.—Recent "etel" heli-manifestations at Breslau have made it difficult to continue peace efforts with Germany. Foreign Minister Austro-British old the Chamber of Deputies in declaring that the government was opposed to any revision of the Young plan.

CHAPTER XX.

Angela was in her element. To be the only beautiful woman aboard a yacht sailing amid fairy isles—no to have the daily companionship of a man who, her husband had implied, was adamant to her charms, and to realize that he was keenly aware of them—to have even as antiquated a male as Colonel Nowell eager for her favors, was the breath of life to her. In no way could Amy Myer be regarded as a rival. She was not beautiful, and it was evident that she cared not a snap of her fingers for the admiration of either Nick or the Colonel.

Myer himself was on his good behavior, and Angela was too absorbed in her conquest of Nick to feel chagrined at the fact that not once had her most maneuvered to be alone with her. Possibly the presence of his small daughter, to whom he was unquestionably devoted, made a difference. Indeed, little Marjorie was the only rival whom Angela feared, for to Nick the child was a source of unending entertainment. Sometimes for entire mornings they would sit on deck playing some ridiculous game, while Angela temporarily deserted, inwardly belligerent with rage, and wondered why the Myers should take a child on a trip of this sort.

Nick grew to like Mrs. Myer. Her blase manner which had repelled him last summer at Bakersville, seemed to drop away on shipboard. At little Marjorie's entreaty she sometimes joined in their games, and with her child, at least, she was unaffected.

And Amy Myer liked Nick. It was on a night when he and Angela had entranced them all by singing together in the quiet, tropic starlight, that, in the privacy of her own stateroom, she conceded that liking to her husband.

"He's a nice fellow, Nick Hastings. It makes me tired to see Angela net her cap for him. She doesn't make much headway; but I tell you what, George Myer, if I find her succeeding as I've watched her succeed with—others, I'll put her for the nearest port."

"Oh, I guess Hastings sees through her all right. He's not the infant class," answered Myer indifferently.

She said, her back to him: "And how about yourself—last summer—on the terrace at Bakersville?"

Myer was bent low over a refractory shoe-lace. When he lifted his face it had acquired a brick-red color that was not the result of tropic sun.

"What do you mean?"

Praises Famous Vegetable Pills For Indigestion

"Having been troubled with indigestion and sick headaches for several months, I was recommended to try your famous Pills. After the first dose I was made aware of their very real tonic value."—Miss M. Crovdon.

Dr. Carter's Little Liver Pills are no ordinary laxative. They are *entirely* and have a very delicate, pleasant action upon the liver, exactly what you need to end Constipation, Acidity, Bilelessness, Headache, Poor Complexion, etc. All druggists, 25c & 75c per box.

W. N. U. 1894

Amy removed a last hairpin, and shook out the wonderful coils of soft, dark hair which was her only beauty.

"So you thought I didn't know, my dear? I fear you were careless. As it happened, I was on the other side of that blue bus; and if I'm not mistaken that freak of a maid was in the dining room, directly behind you. Next time—"

"You know just well that there won't be a next time," he said gruffly. There wouldn't have been—that, if it hadn't been for the moon, and a damn pretty woman thrown in."

"Yes, she's pretty," admitted Amy. She drew a quick sigh as her eyes met her own image in the mirror. Myer heard it, and felt, amidst disgust at his own weakness, a sudden, long-dormant protective tenderness for his wife. He arose, limping toward her on one shoe, and lifted a strand of her beautiful hair.

"Can she beat that?"

"But—but it's all I have, George."

"I'm damned if it is! Do you think for a minute—"

She turned, smiling up at him, her eyes bright.

"No, I don't; but I didn't like her making a fool of you, my dear. That's something no woman who loves her husband likes to see. And she did make a fool of you, to prove to yourself that I'm not a snob. I was sure that my faith in you was unshakable, that I asked her to come with us on this cruise. But I don't like her playing with Nick Hastings. He's got a wife of his own."

Well he hasn't forgotten her—yet; and it's my opinion that he enjoys the kid darn more than he enjoys Angela."

He still held the strand of her hair, a bit awkwardly.

"Amy," he hesitated, "I—I'm sorry about last summer. I don't know what got into me, but—"

"I do," said Amy, "and because I understand, I forgive you; but just look out that it doesn't happen again, George."

"I can promise it won't. I've never broken my word to you, have I?"

"No. Perhaps that's my reason for trusting you."

She gently loosened the fingers that held her hair, and began brushing it with sure, swift strokes. Her husband watched her a moment silently; then sat down and unlaced his other shoe. No more words passed between them; but later when he kissed her good-night, he told himself that he was a miserable cur, and that his wife was the most wonderful woman in the world, which, after all, is a healthful state of mind for a married man.

These were enchanted days to Nick, though at times he worried at the thought that he was accepting a good deal from mere acquaintances. He said as much one morning when he and Amy Myer were playing at a ship-board with Marjorie, whom Nick had taught to be fairly skillful.

Amy smiled.

"My friend, you're worth your weight in gold just as a nursemaid! I've never taken Marjorie to sea, and had so much leisure for myself. The child adores you. If there's any obligation it's on our side."

Angela, who had been watching the game, gave vent to one of her bored shrugs.

"Isn't that a unique way to regard one's guest—as a nursemaid?" she queried languidly.

Nick laughed; but Amy replied unsmiling: "Better to regard a nursemaid as a lady's man, I think, or—or a tame cat."

Their eyes clashed for a moment; then Angela looked away. It was like a sudden unheating of words, which Nick, happily unconscious, did not see. He laughed as he said: "I don't mind in the least being regarded as nursemaid, Angela. Gay says I'm a corker! I can do most anything for the kids that she can, from washing ears to telling bedtime stories."

Her lip curled. For the moment she was angry with him.

"I see. You are then, a sort of mother's helper?"

The words were spiteful. Amy smiled, and thought: "A few more speeches of that kind, and my lady will give herself away." Nick, however, was still good-natured, as he answered:

"I don't mind a bad shot, Angela; but it doesn't hurt. I'd be ashamed not to be something of a 'mother's helper' when I've got two kids and no nursemaid to look after 'em. And I wouldn't miss the fun of it, either. Say! your husband's just finding it out! He has great times with his small protegee."

He regretted the words almost in-

NO MORE ECZEMA

Itching Ends Right Away

Has anyone for several months, single applications of this ointment cured your skin? It is the only ointment that cures eczema, itching, stinging, scaling, etc. All druggists.

stantly. His regret, deepened when he saw that Angela had flushed; but she replied evenly: "Yes, I'm in been devoted to you, Bakersville. Are you so blind as to imagine that Martha is the attraction?"

She met his puzzled eyes with a mocking glance that baffled him. Amy Myer, watching intently, felt suddenly that there was some horrid meaning behind Angela's remark. It was a call to lunch that interrupted the question on Nick's lips, and caused Angela to give thanks to her lucky star. Her irritation had carried her beyond her depth. Next time, she thought, she must be more careful.

It was a week later, one evening when little Marjorie had gone to bed, that Colonel Nowell quite innocently set off a bomb—at least, it was a bomb to Angela, and supplied food for thought to more than one of the party.

The day had been unusually oppressive, followed by an evening of moonlight beauty, that seemed to filter through the hazy atmosphere. The sea was like glass; the air balmy, and fragrant with the scent of some wild shrub, wafted from an island that they were to explore next day. Angela, in high good humor because Nick's chair was close to hers, was crooning a negro lullaby that fitted exquisitely the time and place.

Her voice, softly muted to suit her audience, brought to each one some tender memory.

George Myer reached for his wife's hand and clasped it. Colonel Nowell's thoughts were thirty years away, visioning another moonlit night on the coast of Maine. Nick was thinking of home—wondering if the babies had grown—seeing the look in Gay's eyes when he kissed her good-night.

There was a moment of pure enchantment. Then the voice ceased. It was the Colonel who broke the silence that followed.

"Are any of you familiar with the state of Maine?"

There was a murmured assent. No one seemed yet quite ready for conversation. As the moonlight fell across her knees Amy withdrew her hand from her husband's clasp, and Nick, with a sorry-sorry brought himself back from Bakersville.

"Nothing to my mind is lovelier than the coast of Maine," the Colonel was saying. "Went there thirty years ago, and haven't missed a half a dozen summers since. Stayed most every where from Bar Harbor to York. It's all beautiful; but give me good old Painter's Neck for a steady diet."

(To Be Continued.)

Good-Bye Asthma. Persons suffering from that extremely trying trouble known as asthma know what it is to long, with all their heart, for escape as from a tyrant. Never do they know when an attack may come and they know that to struggle unaided is vain. With Dr. J. D. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

Prehistoric Man

Discovery Made Of Skull Of A Child Believed To Be 50,000 Years Old

A discovery which is expected to prove of great importance in throwing additional light on prehistoric man was made by the young archaeologist, Theodore McCown at Wady Moughara Athlit, says a dispatch from Jerusalem.

It is a child's skull of the Mousterian age, of the same type as the "Galilee skull" found on the shore of the Sea of Galilee in 1925.

The present skull is estimated to be 50,000 years old.

Switzerland sent nearly \$75,000 wrist watches to the United States last year.

OINTMENT

Bees Give Pilot Lively Ride

Hive Broke While Being Transported From Marcellus To Paris

Casanova, one of the pilots of the Air Union Line, will be careful hereafter about who he "takes for a ride" even if he loses his job as a result of it.

On his recent flight from Marcellus to Paris, a distance of 500 miles, he carried a consignment of bees, ten hives in all. As they were carefully stowed away in the baggage compartment of his plane, he never gave them a thought until some so-called airporters and the cries of his three passengers brought them forcibly to mind. After one of the lurches of the machine a hive had fallen to the floor, broken open and released the bees. For a minute or two they had tried to get back to their cells. But finding that impossible and sensing their freedom, they had invaded the cabin and tried to escape through the windows which were unfortunately closed.

The passengers recovering somewhat from their fright, protected their heads with whatever they possessed in the way of scarves, coats and handkerchiefs. And thus they remained until their arrival at the aerodrome.

The unfortunate pilot, however, outside of pressing close his goggles, tightening his ear flaps and buttoning high his coat, could do nothing but keep his hands on the controls. Raising one, he found, only attracted the bees and irritated them all the more. Occasionally some of them alighted on his face and a few left their stings. By rare good luck he had put on his gloves before starting and that saved his hands.

When the plane taxied up to the landing on arrival and the attendants had opened the door, the bees poured out and it was some time before they were re-located by the queen bee to the hive led-back outside.

It was a record run, but, as Casanova says, "Never again."

THE RHYMING OPTIMIST

By Aline Michaels

A CHILD'S WORLD

So vast, so wonderful, so new,
So full of gleam and gold;
Oh, little child, I envy you,
Who see this world unfold!

It is a world of lovely things,
All made for your delight,
By day a world that smiles and sings
Your mother's arms by night!

Here fairy tales come true, sometimes,
Here no deceit can dwell;
To hours as sweet as silver chimes
Life flows, and all is well.

Though soon into your world must
Creep the cares of life,
Some cares, while joys depart,
You can be blest, still, if you keep
A child's glad, trustful heart.

Barber's Itch and Ringworm are relieved by the use of Douglas' Egyptian Liniment; quick, certain results. Relieves the most obstinate cases.

A New World

Sir Oliver Lodge Believes There is a Spiritual World Which Interacts With the Material World

Sir Oliver Lodge, nearing 80 years of age, is quoted by the London Daily Mail as predicting that the next revolutionary development of science will be the discovery of a "new world."

"It will be a spiritual world which interacts with the material world and yet is not of it," he said. "It will be discovered that man isn't the highest being in which we have cognizance, but that there is a multitude of other intelligences, some of them far more highly endowed than ourselves."

Referring to his 80th birthday, he said: "As long as a man can keep well there is plenty for him to do, whatever his age. But it is no good dawdling along in a state of senility. A man may be young at 70, and we should aim at living to be 100."

The conjurer was announcing his act. "I have had telegrams of appreciation," he said, "from people in Ireland, Wales, and England, and a postcard from Scotland."

At Last! The Truth About PIMPLES

Pimples, acne and blackheads are caused by a rundown, disordered system, by those harmful acids and toxins which make your skin rough. So if you want swiftly to rid yourself of these ugly blemishes, you must learn to obtain healthy, smooth and soft skin for all times—eyes sparkling like diamonds—superb daily health—take Kruschen Salts.

Kruschen Salts are a perfect blend of the six vital salts which nerves, glands, blood and body organs ought to receive from food if they're to work properly—but it's simply impossible to obtain these salts in these days of modern cooking.

Therefore take Kruschen Salts in a glass of hot water every morning before breakfast—this quickly puts back the precious minerals into your system—and drives out harmful acids and toxins, assuring you enviable and glorious youthful beauty and health.

Little Helps For This Week

"And the angel said unto them, Fear not; for, behold, I bring you good tidings of great joy, which shall be to all people. For unto you is born this day in the city of David a Saviour, which is Christ the Lord."—Luke II, 10, 11.

And clear today as long ago,
The angel chorus echoes still,
Above the clamour and the throng
Of human passion, human weal;
"Good-will and peace, peace and peace."

Through eighteen hundred stormy years,
The dear notes ring and will not cease.

And past all mists of mortal tears,
The guiding star rebukes our fears;
"Peace and good-will, good-will and peace."

—Susan Coolidge.

If we will really persevere in our endeavours and in our prayers, we may be sure that He who was on this day born into the world—the Saviour of sinners—and who grew up as a tender plant in a dry ground, will cause the dry ground of our hearts to become fruitful, and the seed of grace to spring up, first the blade, then the ear, then the full corn in the ear.—Peter Young.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Eucalypti Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

A Stein Of Milk

German University Students Are Said To Be Giving Up Beer

German university students who have been clamoring for a change as gallant bolsters of the beer stein are taking to milk under the tutelage of the Women's Christian Temperance Union, according to Dr. Bertha Kaus, graduate of the University of Frankfurt, who addressed the W.C.T.U. convention at Toronto.

"We have opened a big restaurant—without alcohol—on the campus of the University of Cologne, and you can find there, several hundreds of fraternity students sitting in the garden with a bottle of milk" said Dr. Kraus.

Office Boy.—There's a travelling salesman calling outside, sir—man with a moustache.

Boss.—Tell 'em I've got a moustache.

CORNS Lift off—No Pain!

QUICK RELIEF

Put a drop or two of Putnam's on the sore corn and out comes all the corn. The corn shrivels up and drops off. No scar, no pain, no pinching, no itching. You can go about your walk in comfort. Use only Putnam's Corn Extractor. Satisfaction guaranteed. Sold by druggists everywhere.

PUTNAM'S

Edmonton Beach.

A goodly crowd of dancers put in an appearance at the Midnight Frolic, which opened at 24:05 Monday morning. Martin's Orchestra played its best, and everyone was delighted.

The ball game Saturday afternoon between two City teams proved very interesting, and the fans seen a good game.

Mr Barrie has been invited to attend the banquet of the Stony Plain Basketball league to be held shortly in Stony Plain. Mr Barrie has been donating cups to the league every year since it was organized.

The cottagers here have taken up their residence here at an earlier date than in former years.

The roads hereabouts are drying up in good shape after the recent heavy rains.

Mr Barrie is making extensive arrangements for the big celebration at the Beach on Dominion Day July 1. There will be competitions for the pupils of all the rural schools hereabouts; and a host of other competitions for every one.

Baseball News.

Stony's Senior ball team is billed up ahead for games with various outside teams. They have games coming from both Millet and Evansburg teams from the 1930 season; and these are likely to be played off in the near future. They will probably go up to the Duffield picnic on Saturday next; and have been invited to the Sports day at Junkins on Dominion day.

Exception having been taken by some of the Intermediate League members to the participation of some players in one of the clubs, a meeting of the league executive to hear the complaints was arranged, to be held on the completion of the Enox-Stony game last week; but owing to the threatening weather, it was decided to postpone the meeting.

The Seniors' game with the South Side, June 11, proved a win for the visitors over the Seniors by 8-4.

The ball game on the local diamond Sunday afternoon between a Comet team and Stony Pickups resulted in a win for the former by 18 runs to 16.

Duffield Doings.

The Big Picnic here Saturday, no doubt, drew the usual big crowd. There's the baseball tournament; the competition for the Faulk Cup; races of all kinds; ending with the dance in the evening.

Mr and Mrs J H Coates of Duffield announce the engagement of their eldest daughter Pearl Gwendolyn to Mr John Schlitt, the wedding to take place early in July.

Mesdames G O'Sullivan and O Ohlsen are convenors for the meeting of Duffield Women's Institute next Tuesday, the 23rd. Subject: Child Welfare and Public Health. A report will be made to the meeting by the delegates who attended the recent W. I. convention in Edmonton recently. "Contribution received for First Aid work," is also down on the agenda. The hostesses will be: Mesdames G O'Sullivan, O Ohlsen and Dennill. Roll call, "My most embarrassing moment," or "A humorous story."

The Gent from Regina.

The following is reprinted from the Journal, and is in line with the flood of free advice non-agriculturists have been sprinkling on the farmer since the Fall of 1929:

"Stressing that in no other country in the world has the farmer been so well encouraged by a Government, Senator Laird of Regina told the Credit Men's convention in Toronto last week what the Western farmer must do to retrieve his fortune and regain his purchasing power. He must live on his farm and within his income. He must revert to conditions that obtain in other agricultural countries and depend on the farm itself for his living. He must make money instead of borrowing it. The heavy over-burden and ill-advised borrowing in the past is what is now oppressing him. He must develop along the lines of smaller and more intensively cultivated farms."

Any agriculturist who has read down this far will have learned how to make money on the farm, all in one lesson.

Heard on Main Street.

Mrs Newlywed—Are you sure this cleaner will take out all the dirt?

Hardware Clerk—Will it? Say, lady, yesterday I rubbed some of it on a copy of Scandalous Stories and when I got thru I had The Sunday School Gazette.

Card of Thanks.

Mrs Fred Straus and Family wish to thank the people of Stony Plain and District for their expressions of kindness and sympathy on the occasion of their recent bereavement.

Church Services.

United Church service every Sunday Evg. at 7.30.

Sunday next, June 21, English Lutheran service at St. Matthew Schoolhouse at 7.30 p. m., by Rev. H. Kuring.
